

Fertri's **ROOF-SHADE** structures are the perfect solution to protect the crop from sunlight, strong winds and insects without isolating completely the plants.

They are formed by steel columns, reinforcements and profiles and are covered with different types of mesh.

Easy to assemble some of them can be reconvered in multitunnel greenhouses doing small modifications.

Crop protection
Versatile
Economic
Reusable structures
Mesh Cover

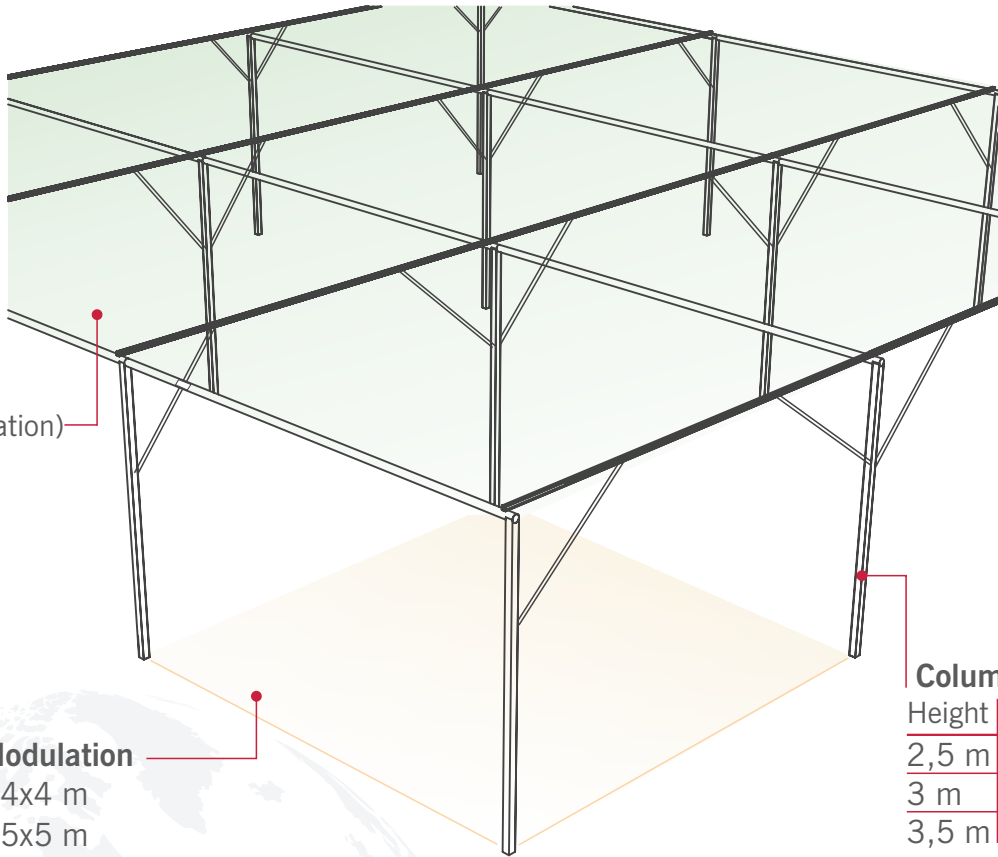

Types

Similar structure to multitunnel greenhouse, but covered with diferent mesh.

Features

FlatRoof

Mesh (Classification)

- % Shading
- Color
- Type of crop
- Warp

Modulation

- 4x4 m
- 5x5 m

Columns

Height	Section
2,5 m	60x60 mm
3 m	60x60 mm
3,5 m	80x60 mm
