

BIG SURFACES

MULTI WIDE SPAN

Gable roof

STRENGTH

VERSATILITY

ADAPTABILITY

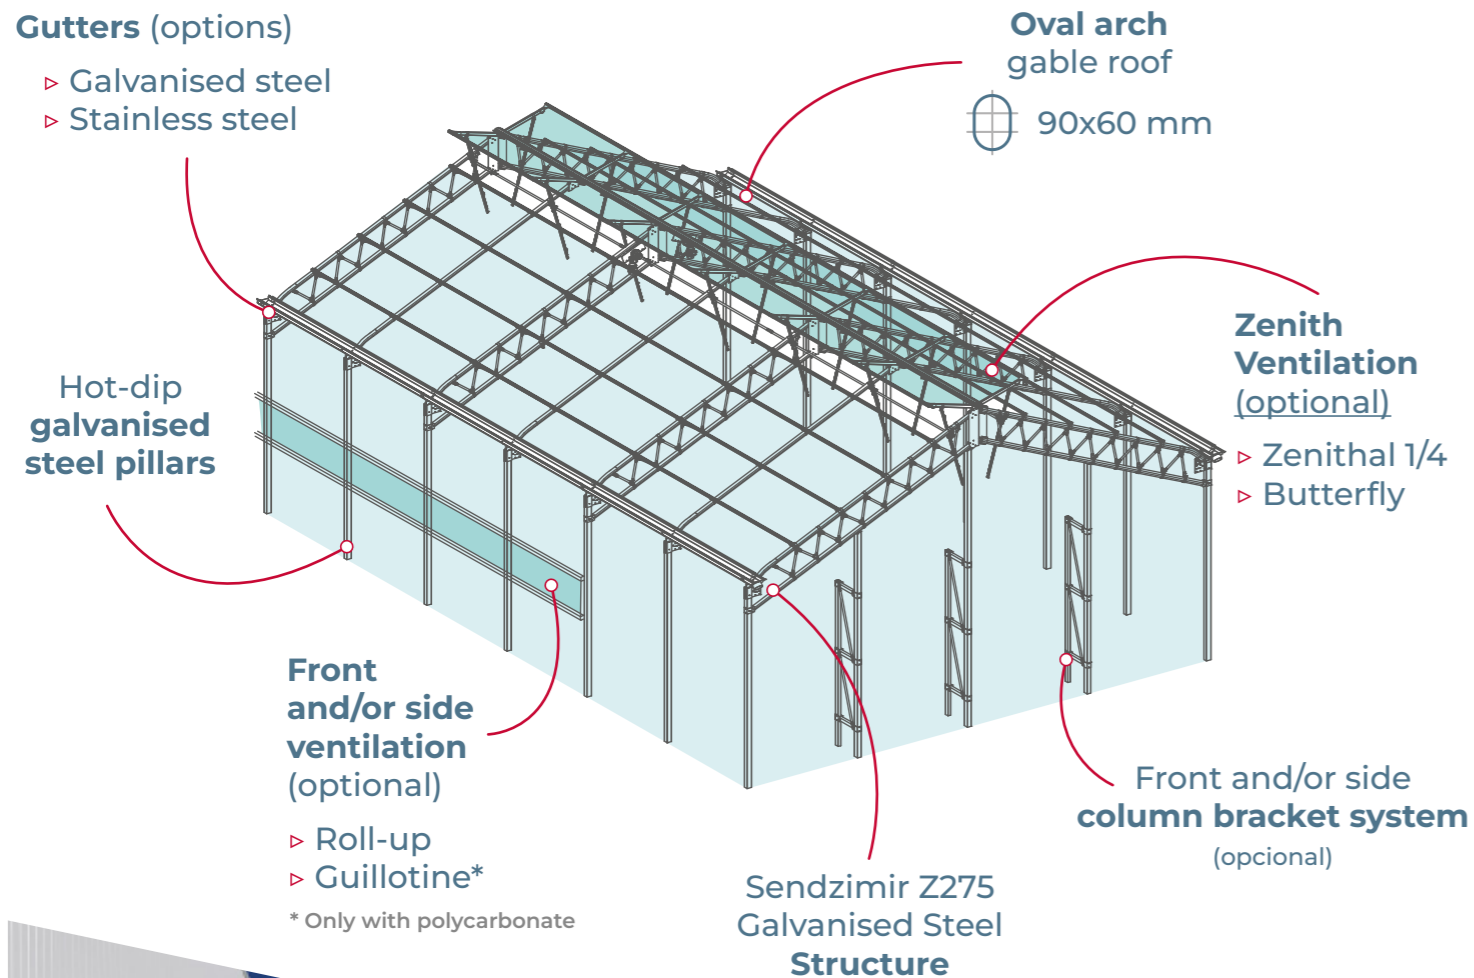

EFFICIENCY AND DURABILITY FOR LARGE CROPS

The FERTRI MULTI WIDE SPAN model is a modular structure with a **flat gable roof**, designed to offer maximum versatility of use. Unlike traditional greenhouses with curved arches, this model has a geometry that allows for the installation of **completely rigid coverings**, such as sandwich panels up to 40 mm thick or translucent materials such as polycarbonate.

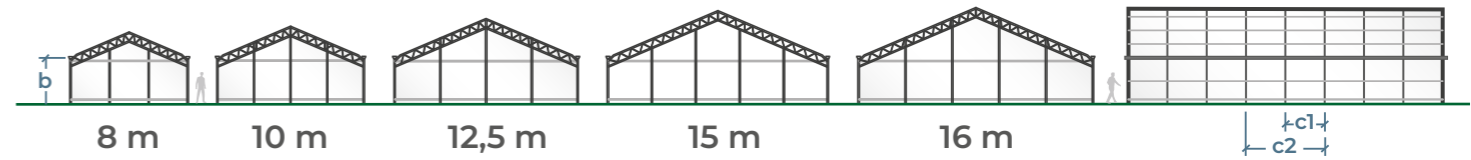

Thanks to its functional and adaptable design, it can be configured **both as a productive greenhouse and as an agricultural storage space**, offering strength, brightness and an optimised solution for different needs in the sector.

Gutters (options)

- ▷ Galvanised steel
- ▷ Stainless steel

▷ Dimensions to choose

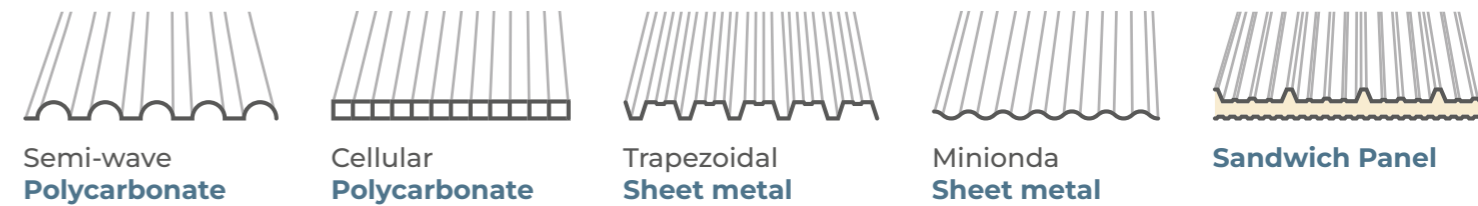

b. Height under gutter (options)

3,0 m	3,5 m	4,0 m	5,0 m	5,5 m	6,0 m	6,5 m	7,0 m
-------	-------	-------	-------	-------	-------	-------	-------

c. Modulation options

c1. External	2,0 m	2,5 m	◀ Sep. between arches and between external pillars		
c2. Internal	2,0 m	4,0 m	2,5 m	5,0 m	◀ Separation distance between internal pillars

▷ Rigid coating options*

*Other coverings such as plastic or mesh can be placed around the perimeter. Not available for roofs.

▷ Key features

- GABLE ROOF**
This gable design provides a regular and stable surface, facilitating the installation of rigid coverings.
- HIGH RESISTANCE**
Solid, balanced structure capable of withstanding wind or snow loads with great stability.
- HIGH INTERIOR HEIGHT**
The working height allows for the installation of thermal screens, mesh and sprinkler irrigation.
- 100% DISMANTLABLE FRAME**
The bolt-on connection system allows the structure to be easily assembled and dismantled.
- VERSATILITY OF COVERINGS**
It supports rigid materials, allowing the model to be configured as a greenhouse or agricultural warehouse.
